1. What is markdown?

Markdown is *a markup language used to format plain text documents in a simple and readable way.* It was created by John Gruber in 2004 to make it easy to write and convert text into structured documents like HTML, PDFs, and more.

2. What is Linux?

Linux is *an open-source, Unix-like operating system kernel created by Linus Torvalds in 1991.* It serves as the foundation for many different Linux distributions *(distros)*, such as Ubuntu, Debian, Fedora, Arch Linux, and CentOS.

3. What is Ubuntu?

Ubuntu is *a popular Linux distribution (distro) based on Debian.* It is known for its user-friendliness, stability, and security. This makes it a top choice for beginners and experienced users alike.
